

Emergency

Unified Alerting Solutions

Alert

- Pull Cord
- Mass Alerting and Notification
- Panic Button
- Wandering Resident
- Environmental Control
- Fire Panel
- Security

When Time Matters Most

- Wireless Phone
- Email
- Desk Phone
- Home Phone
- Pager
- Wall Board

Overview

Our Unified Alert solution enables a unified awareness approach by leveraging current generation tools like email, voice, web and wireless, to keep people aware and make them more productive. Our solution takes a wider view of the facility's true needs by providing a solution that addresses life safety and security, environmental conditions affecting the facility, as well as the need for mass notification or communication of both emergencies and non-emergencies. Regardless of your industry, your need to achieve unified awareness can be met.

Solutions Architecture

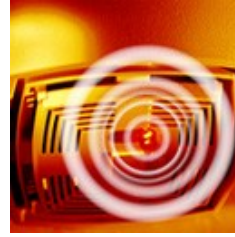

Our solution is an automated alerting system and awareness engine that sends voice and text alerts via phone, email, etc. it provides a wireless sensor network, integration tools (to existing systems and devices) and broadcast communication in a single solution.

Monitored Devices

Leveraging the integration tool set, we have the expertise to build upon your current systems. Our solution integrates to an array of sensors and monitored devices including mobile duress transmitters or pendants, pull cords, door and window monitors, smoke alarms, motion detectors, etc. This can also include hard wired legacy nurse call systems, fire panels, security systems, etc. Alert messages regarding the alarm event will then be delivered in a text-to-speech format via various alerting devices.

Alerting Devices

Through a simple to use text to voice engine, we can send voice and text alerts to in-building pagers and radios, email and telephones, as well as to cell phones, home phones and external email. This allows both staff and residents to be notified of important events at any time, any place. Staff members can quickly address safety and security concerns or environmental problems before they turn into emergencies. Likewise, residents can hear the unique text to voice and be reminded of community activities and events.

Sample Alarms

- **Doors/ windows** – door and window sensors
- **Pendants** – fixed and mobile pendants, pull cords, panic buttons
- **Sensors** – smoke detectors, motion detectors, moisture/ humidity sensors, cigarette busters
- **Other** - Systems such as nurse call, wander management, fire panel, access control,

Sample Alert Devices

- **Phone** - wired and wireless PBX telephones, cellular phones
- **Email** - email via PCs, PDAs
- **Radios** - two-way radios, PA systems
- **Pagers** - pagers, PDAs

Life Safety Assurance

Unified Alerting improves life safety by turning multiple alarming systems into a single managed alerting solution allowing for more efficient processes and faster response times. Our solution provides wireless emergency call, integration tools (to hard wired Nurse Call, Fire Panels, etc.), and broadcast communication in a single solution.

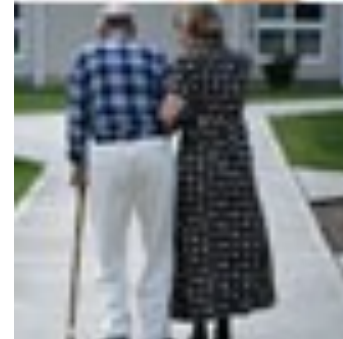

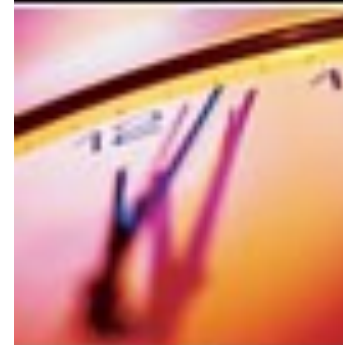

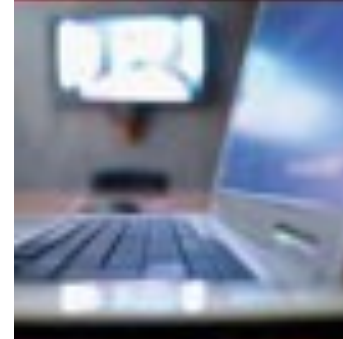

Life Safety Sensors

- Mobile Pendants
- Fixed Panic Buttons
- Pull Cords
- Bed/ Chair Sensors
- Specialty Call Cords (air activated, light touch)

Panic/Duress Systems

Wireless panic/duress systems alert security personnel and your employees to threatening situations that may be developing. Immediately alert executives and key personnel to initiate protective or evacuation procedures. Parking facilities with stationary panic buttons or wireless pendants carried by employees provide maximum efficiency in alerting security personnel to potential threats.

- Office Buildings
- Retail Malls
- Industrial Buildings
- School Campus
- Parking Structures
- Courthouses
- Commercial Properties

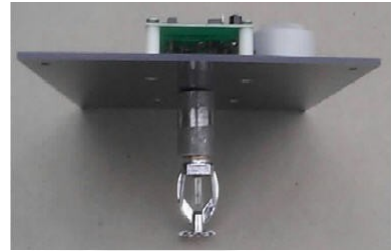

Security Monitoring

Unified Alerting helps mitigate risk to your business and your property by keeping you aware of all security related issues. Sensors can be placed through out your facility to detect security concerns, but it is the alerting engine that can then notify the appropriate individuals that a breach is occurring.

Security Sensors

- Door/ Window Sensors
- Motion Detectors
- Glass Break Detectors
- Cigarette Busters
- Video Cameras
- Fire Panel Integration

Environmental Awareness

If a sensor being monitored by the server detects a sudden environmental change or a system failure, the server will alert the appropriate staff to address the issue before it becomes a major concern that could cause damage or inventory loss. Improve safety compliance during operating hours and after hours by monitoring your equipment in critical areas when employees are not present.

Environmental Monitoring Sensors

- Equipment Monitors
- Freezer/ Temperature Monitors
- Smoke/ Flame Detectors
- Moisture/ Humidity Detectors
- Cigarette Busters

Mass Notification

Unified Alerting increases awareness, mobility and safety by providing an automated means of communicating both emergency and non-emergency alerts, activities and events. Having the ability to notify large groups of people in disperse areas in an effective and efficient manner via multiple means of communication could save lives.

Alerting Devices

- Pagers
- Email
- Cell Phones
- Phone System
- CCTV
- LED Wall Boards
- Hands Free Intercom phone

Unified Communications

Imagine all your business communications working together. Imagine fast, seamless collaboration with colleagues and customers.

Unified Communications Brings Together

- Traditional Phones
- VOIP Phones
- Soft Phones
- Mobile Phones
- Conferencing (Voice and Video)
- Email
- Instant Messaging
- Remote Offices and Workers
- Remote Access Solutions

Services

No Fee, No Risk Consultation

911 Nerds has over 35 combined years experience in the design and installation of information technology, communications, wireless technology and nurse call systems. Due to this experience we are aware of our customers' changing needs so that each system can be tailored to your individual requirements and budget.

Contact us today for your No Fee, No Risk Consultation.
